Course Outline Template

Indian Institute of Management Calcutta

Programme : MBA

Name of the Course: **Blockchain and Its Implications**

Core / Elective Elective Cap (for Elective) **None**

Credit: **1.5**

Academic Year & Term: **2026-27; Term VI**

Course Coordinator: **Anik Mukherjee**

Email: **anik.mukherjee@iimcal.ac.in**

Instructor: Anik Mukherjee (Sessions 1 – 10)

Affiliation: IIM Calcutta

Email: anik.mukherjee@iimcal.ac.in

Instructor: ……..(Sessions … – …)

Affiliation: ……..

Introduction to Course /Course Description

Blockchain, once just the underlying technology of Bitcoin, has since then evolved into a phenomenon by itself that is currently being deployed in many areas other than cryptocurrency. Blockchain is an incorruptible, transparent, and distributed digital ledger of economic transactions that can be programmed to record not just financial transactions but virtually anything of value. While internet is basically about sharing information, blockchain can locate the origin of it, track all the changes to it, and make the records of change immutable, and hence, can be immensely useful in many situations. However, the biggest bottleneck in wide-scale adoption of blockchains is the small number of people who are knowledgeable about it.

Course Objective and Key-takeaways from the course

At the end of the course, a participant will be able to:

- understand the features of the technology

- identify the application areas where the technology can make a difference
- appreciate the variations in the technology to suit specific genre of applications
- track the refinements and changes in the technology in future

Programme Level Learning Goals (7)

Goal 7, (a) and (b)

International Components in your course (if any)
The international components in this course come from the case studies used in the course. A variety of examples of possible deployment of Blockchain in various organizational contexts are discussed throughout the course.

Pre-requisites
None

Required Text Book(s)
None

Recommended Text Book(s)

1. Blockchain Revolution: How the Technology Behind Bitcoin and Other Cryptocurrencies Is Changing the World, Don Tapscott and Alex Tapscott, Portfolio/Penguin, 2016
2. Bitcoin and Cryptocurrency Technologies, Arvind Narayanan, Joseph Bonneau, Edward Felten, Andrew Miller, Steven Goldfeder, Princeton University Press, 2016

Course Pack Distribution to students

Course material to be issued from the Programme office

Technology enabled learning component for your course
None

Session Plan

Session	Coverage	Readings/Cases
1	Introduction to the course and Blockchain	Article: An Introduction to Blockchain, Darden Business Publishing, UV7356
2	Blockchain Basics: The Bitcoin Platform	Article: Blockchain Technology: Beyond Bitcoin, Berkley Whitepaper Article: Blockchain, Cryptocurrencies, and Digital Assets, HBS 9-818-066
3	Towards world computer: The Ethereum Platform	Article: Ethereum whitepaper
4	Permissioned Blockchain: The Hyperledger Platform	Article: Introduction to Hyperledger
5	Blockchain and Financial services	Case: HSBC: Facilitating Trade Finance through Blockchain, HBS A00315 Case: Ripple: The Business of Crypto, HBS 9-719-506
6	Workshop: Conceiving a Blockchain project	In class exercises
7	Blockchain and Supply Chain	Case: Maersk: Betting on Blockchain, HBS 9-518-089 Case: Walmart's Blockchain Quest:

		Integrating New Technology into a complex supply chain
8	From Practitioner's viewpoint	Guest lecture
9 - 10	Presentations on related topics	Groups will present on current status of blockchain applications in areas like Government, Real Estate, Stock Market, Media, Energy, Identity Management, CBDC, cross-border payments, distribution of vaccines and medicines, NFTs, voting, and similar other areas

Evaluation Components

Group Level:	Analyses of 2 identified cases around the lead questions (20%)
	Assignment (20%)
	Report and Presentation (30%)
Individual Level:	Written Examination (30%)
