Introduction to Course /Course Description

Financial services are often associated with commercial banking and investment banking. This course will focus on selected topics in financial services, covering some of the latest trends, products and players.

The course will help participants aspiring to work in financial services companies, consulting firms, wealth management firms, corporate treasuries, asset management companies etc., to acquire breadth of knowledge in some of the latest developments in financial services, and certain traditional areas hitherto uncovered.

The role of investment banks in managing IPO's and syndicating loans, SEBI regulations for issue of capital and disclosure, overview of wealth management, mutual funds, insurance companies and non-banking finance companies would be part of the scope.

The course will provide an industry veteran's perspective on financial services.

Course Objective and Key-takeaways from the course

1. **Possess state-of-the-art knowledge of theory and practice in all functional fields of management and the ability to think critically, and apply them to diagnose and find solutions to organisational problems, even in unfamiliar or uncertain situations**
