Introduction to Course /Course Description

Media and Entertainment are large, global and dynamic industries that have huge influence on human society and almost all businesses. They have unique business and marketing characteristics that require specialized knowledge and skills for managing them successfully.

In India, post Liberalization and Globalization starting from the 1990s, the Media and Entertainment businesses have grown phenomenally in size, complexity and impact, across all platforms – TV, Films, FM Radio, Print, and especially, Digital & Social Media. It is today one of the largest and most thriving media markets in the world. Along with the growth and ensuing competition, has emerged the need to professionally market various media products to audiences & advertisers, and this too needs specialized category knowledge and skills.

India has always been rich in culture and entertainment, but only very recently have professional marketing capabilities been started being applied to this domain. However, since the business has its own unique dynamics, and as market offerings are essentially socio-cultural products, marketers perhaps have as much to learn from entertainment specialists as the other way around. Further, in spite of the

country's rich, deep and wide artistic, creative & cultural heritage, Indian Media & Entertainment Products have had limited global success, perhaps a big relatively untapped opportunity that can significantly add to India's global 'Soft Power'.

Understanding Media & Entertainment industries is important for all marketers as they offer powerful alternative marketing platforms for a very large number of categories.

Thus, Media & Entertainment industries are important for Marketing Practitioners not only because these are growing high-potential industries that need specialized marketing capabilities, but more so because in this era of mass media fragmentation, clutter, audience fatigue and ad avoidance, marketers increasingly need alternative communication platforms to build stronger connections and deeper relationships with their target audiences. This is where various evolving media and entertainment platforms are emerging as powerful alternatives to traditional marketing communication channels. It is for this reason that all students of marketing would find this course especially useful.

This course will equip interested students with a conceptual and practical knowledge of Media & Entertainment industries, with a focus on Marketing aspects of these industries.

Media and Entertainment Marketing will thus be looked at from two perspectives – the Marketing <u>of</u> Media & Entertainment products, services & experiences, and Marketing <u>through</u> Media & Entertainment platforms.

Course Objective and Key-takeaways from the course

The Major Course Objectives, Learning Outcomes & Key Takeaways of the Media and Entertainment Marketing course are as follows: -
